

Marcel Qayoom-Taylor

www.linkedin.com/in/marcelqayoomtaylor <https://marcelqt.vercel.app>

Education

Bachelor of Engineering (Software)

2021-2025

University of Technology Sydney

- First Class Honours (HD Average)

Waseda University (Exchange)

Work Experience

Software Engineer

2024 - Present

Luxury Escapes

- Delivered ML-driven hotel recommendations at scale through Python microservices and React/TypeScript web applications
- Led CI/CD optimisation initiatives, reducing pipeline runtime by 67% (60 → 20 minutes)
- Scoped and delivered multiple high-impact initiatives, including leading a project to a \$15M annual margin increase
- Built and maintained scalable REST/gRPC APIs and Postgres database systems for high-traffic production applications
- Promoted from Junior to Mid-Level Engineer within 5 months; on track for Senior promotion in 2026
- Mentored graduate engineers through progression to mid-level roles

Founder

PantryPal

2023 - Present

- Building a TypeScript/React Native mobile app to make home cooking easier - launched on the App Store 2023
- Design and implement full-stack mobile features informed by user analytics and feedback
- Grew the platform to 5,000+ users through product iteration and content-driven marketing
- Migrated the app from native Swift to React Native to enable cross-platform support
- Leading a team of 2 founding engineers in an agile development format

Project Lead / Software Engineer

2023

Centre for Social Justice & Inclusion

- Led a team of 8 engineers to design and deliver a production-ready React/TypeScript web application within 12 weeks
- Gathered requirements, produced Figma prototypes, and managed stakeholder communication and project scope
- Developed, deployed, and maintained features in a fast-paced Scrum environment over an additional 3-month engagement

- Maintained ongoing communication with stakeholders via weekly progress updates and user testing

Software Engineer Intern

2022-2023

Now Circular (YC W22)

- Worked in an agile environment to deliver solutions for full-stack problems
- Communicated extensively with shareholders to develop requirements and solutions
- Made documentation via writing, diagrams and videos to explain information systems
- Worked with various internal teams to automate processes and increase their efficiency

Technical Skills

Proficient Languages:

Swift, Python, Typescript, Java, C, C++, SQL, C#, HTML, CSS,

Frameworks/Tools:

SwiftUI, CoreData, React, NextJS, VueJS, NodeJS, Express, MongoDB, Anaconda, Vercel, Figma Tailwind, ShadCN, Framer, MaterialUI, React Native

Relevant Projects

GuideDog

2024

- A dev tool that automates making web apps more accessible
- Managed the development of a Node package and VSCode extension
- Worked in a Scrum environment to build the project in 10 weeks
- Successfully deployed to the public and made the project open-source

Social Posting Automator

2023-2024

- Built a Python tool & GUI to automate weekly posting across multiple social media
- Reduced task time from 45 to 15 minutes per week (66% efficiency increase)
- Upgraded the tool from CLI to GUI so non-technical workers could also use the tool

The Urban Barista

2019 - 2021

- Built social media accounts from 0->100k followers
- Managed advertisers and product placement on a near-daily basis
- Successfully exited the business after achieving audience growth targets
